VIROSAN®

MOLLDU

DISINFECTION 360

SURFACE AND AIR DISINFECTION

MOLLDU – DISINFECTION 360 disinfects and sterilises surfaces and air in rooms, removing bacteria, viruses, fungi and spores – without any alcohol.

In pigeon racing, hygiene in the loft is crucial – both for preventing disease and for the well-being of the animals. MOLLDU – DISINFECTION 360 offers a gentle and extremely effective solution: based on hypochlorous acid (HOCl), it eliminates up to 99.99% of all pathogens. It is harmless to humans and animals, is not classified as hazardous, is gentle on materials without any odor and leaves no residue at all.

MOLLDU – DISINFECTION 360 is designed for universal use in pigeon racing – for maximum effectiveness and particularly effective odor neutralisation.

AT THE LOFT

- entire loft and equipment such as nesting boxes, perches, flight holes, etc. ...

AT THE CLUB

- transport crates, baskets and drinking troughs
- pigeon transporters and trailers
- club premises and much more

APPLICATION

1.8 Liter rechargeable fogger

Apply evenly to pre-cleaned floors, surfaces and objects. After the application time, wipe off with a clean cloth if necessary.

Use the rechargeable fogger to disinfect air and surfaces in hard-to-reach areas. A subtle chlorine smell indicates effectiveness and dissipates quickly after application.

- Dilution ratio 1:5 (MOLLDU / water)
- Shock disinfection 1:1 (MOLLDU / water)

PROTECTION AGAINST

- E. coli
- Legionella
- Campylobacter
- Pseudomonas
- Salmonella
- Streptococcus
- Staphylococcus
- Avian influenza
- Infectious bronchitis
- Rotavirus
- Paramyxovirus
- Trichomoniasis
- Coronavirus
- Yeasts/Molds
- Mycobacteria
- Spores
- Clostridium difficile
- Bacteriophages

limited Virozid Plus incl. med. Sporizidi

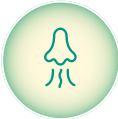

99,99 % EFFECTIVE AGAINST BACTERIA, VIRUSES, FUNGI & SPORES

SAFE FOR HUMANS, ANIMALS AND THE ENVIRONMENT

ALCOHOL-FREE
NON-FLAMMABLE
NON-TOXIC

REDUCES MICROBIAL ODORS

Protect from sunlight and extreme temperature fluctuations for maximum effectiveness.

Always use biocides safely. Please read the product information carefully!

VIROSAN®

MOLLDU

AQUA IGNITION

HYGIENIC FRESH WATER, GERM-FREE PIPES

MOLLDU - AQUA IGNITION is used for cleaning and disinfecting water-carrying systems and containers.

Even if tap water appears clean at first glance, old or rarely used pipes and hoses can harbour contaminants such as bacteria, slime and biofilm. Treatment of the entire water system with MOLLDU – AQUA IGNITION disinfects the fresh water, reduces the risk of infection and eliminates bacteria, fungi and viruses, including Legionella.

MOLLDU - AQUA IGNITION is based on a purely mineral, non-toxic, electrochemically activated saline solution. It is easy to use and completely safe for humans and animals.

With less than 1% sodium hypochlorite and less than 10% sodium chlorite, MOLLDU – AQUA IGNITION disinfects your fresh water environmentally friendly and meets the requirements of the German Drinking Water Ordinance (DVGW).

DISINFECTION AND TREATMENT OF FRESH WATER

 **Pipes, hoses, pigeon drinking troughs and tanks**

99,99% EFFECTIVE AGAINST BACTERIA, FUNGI & VIRUS (INCL. LEGIONELLA)

SAFE FOR HUMANS, ANIMALS AND THE ENVIRONMENT

**ALCOHOL-FREE
NON-FLAMMABLE
NON-TOXIC**

**PURE MINERAL
ACTIVE INGREDIENT,
EFFICIENT IN USE**

Protect from sunlight and extreme temperature changes for maximum effectiveness.

Always use biocides safely.

Please read the product information carefully!

APPLICATION

For cleaning and disinfecting water-conveying systems such as pipes, hoses and tanks. Suitable for automated dosing in drinking water installations.

CLEANING OF PIPES, HOSES AND CONTAINERS

3% solution (30 ml/tsp per liter) – allow to soak, then rinse thoroughly.

FRESH WATER TREATMENT & BATHING WATER

0.5 – 1% solution (5–10 ml/tsp per liter)

PROTECTION AGAINST

- E. coli
- Legionella
- Campylobacter
- Pseudomonas
- Salmonella
- Streptococcus
- Staphylococcus

available sizes

VIROSAN MOLLDU AQUA IGNITION
BAuA No. N-119971

Double hygiene - maximum effectiveness

MOLLDU – AQUA IGNITION & MOLLDU DISINFECTION 360

The Montafon dialect word ‘MOLLDU’ means ‘WOW’ – the disinfectant solution with a ‘WOW’ effect in pigeon racing

Invisible risks in pigeon racing – bacteria, viruses and fungi, including Legionella, in:

- the complete loft and equipment
- nesting places and on perches
- transport boxes and baskets
- carrier pigeon transporters and trailers
- pigeon drinking troughs and drinking systems
- feed containers
- bathing water
- hands when in contact with pigeons

Only regular and effective cleaning and disinfection can ensure the health of the pigeons and fanciers – which forms the basis for lasting success.
